

EXPERIMENT 06

Thivyaa P 240701570

Aim

To design multiple UI layouts using GIMP and evaluate them based on user feedback to identify the best design.

Introduction

User Interface design plays an important role in enhancing user experience. Different color schemes and layout styles can affect readability, usability, and visual appeal.

In this experiment, a login interface is designed and three different color variations are created using GIMP. These layouts are compared based on user feedback to select the most effective design.

Procedure (4 Steps)

Step 1: Create Base Layout

- Opened GIMP and created a new canvas (1080 × 1920)
- Designed login interface using Rectangle, Text, and Fill tools
- Added elements like email field, password field, and login button
- Organized components using layers

Step 2: Create Layout Variations

- Duplicated the base design using **Image → Duplicate**
- Modified colors using Bucket Fill and Colorize tools
- Created three layouts:
 - Layout 1: Gold theme
 - Layout 2: Orange theme
 - Layout 3: Green theme

Step 3: Export Designs

- Exported each layout as PNG format
- Saved as separate files for comparison

Step 4: Evaluate and Compare Layouts

- Compared layouts based on appearance, readability, and usability
- Collected feedback from users
- Identified strengths and weaknesses of each design

User Feedback

Layout 1 (Gold Theme)

- Provides an elegant and premium look with warm color tone
- Overall design is visually appealing and attractive
- Slight contrast issues make some text less clear
- Button visibility can be improved for better usability

Layout 2 (Orange Theme)

- Bright and eye-catching design that attracts user attention
- Good visibility of text and buttons due to strong colors
- Highlights important elements like login button effectively
- However, strong color may cause discomfort for long usage

Layout 3 (Green Theme)

- Clean and simple design with a balanced color scheme
- Provides good readability and clear visibility of elements
- Comfortable for users and suitable for long usage
- Most preferred layout due to better usability and design

Result

The experiment shows that color variations impact user experience significantly. Among all layouts, the green theme was selected as the best due to its clarity, comfort, and user preference.
